**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of invention as shown in F 30-45 in the reply filed on 1/13/2010 is acknowledged. However, Figs. 30-45 present multiple sub-species, which are structurally different to one another. For the purpose of further the prosecution, sub-species as shown in Figs. 30-34 is selected. Claims 1, 4-7, 38-39, 41-42 read on sub-species as shown in Figs. 30-34 are examined. Claims 2-3, 9-30, and 40 directed to other sub-species are withdrawn from further examination.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of

2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 4-7, 38-39, 41-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Briggs et al.-7,344,507 (Briggs).

As to claims 1, 4-7, 38-39, 41-42, Briggs (F 93-96; C 63, L 48 to C 64, L 67) discloses a body sampling system comprising bare penetrating members / lancets 183 coupled together by tape / belt 807 including upper-tape 809 and lower-tape 811 to cover the tips of penetrating members / lancets 183 and define a sterile enclosure for the tips, cogs 820 &/ 826' as a penetrating member release device for piercing holes 821 &/ holes 825 respectively of the sterile enclosure defined by tape 809 &/ 811 to release penetrating members 183 from the sterile enclosure defined by tape 809 &/ 811 and to move penetrating members / lancets 183 to engage coupler 713 of a penetrating member driver 179, and lancet guide wheel 826 (F 96) as a penetrating unloading device for removing a used penetrating member from the penetrating member driver 713 substantially as recited in the claims.
